Software Applications

“ Still using Yahoo or Gmail or some other email system for your small business email system? How valuable is your corporate image? Are you presenting the same professionalism with your email address as you do with the rest of your business? With DUCC Systems email services, you can have email addresses at your domain name for a very reasonable cost. We also provide tools to help you grow and manage your email accounts straight from the web. “

QUESTIONS???

Why a website?

What type of website?

Philosophy behind the website.

Applications in a website

Our Clientele speak

“ Clear, concise designs portrayed exactly what we were looking for in our website. DUCC Systems was a tremendous asset in reaching our goals and a pleasure to work with. An equally efficient E-commerce web solution for our MLM business has been achieved by DUCC Systems at a very affordable price. ”

Mr. Amarjeet Singh
CEO, Ever Young Health
Care
www.everyounghealthcare.com

“ Our school approached DUCC Systems with a very special requirement in mind. We had to present Dr. B. R. Ambedkar as the mentor of our school, bringing out the school’s emotions attached with him. DUCC Systems has catered to this need of our organization extraordinarily, our school’s ideas have now become synonymous with the principles of Dr. B. R. Ambedkar. I thank DUCC Systems for this achievement.

Principal, Mr. V.K. Dogra
Ambedkar Convent School

Why a Website?

- ⇒ Information Sharing
- ⇒ Presence on the Web
- ⇒ One of the best advertisement strategies
- ⇒ Feedback from the viewers
- ⇒ A permanent E-mail facility
- ⇒ Current news and notices
- ⇒ Display of the technical growth of the organization
- ⇒ Beating the competition
- ⇒ Business opportunities and growth
- ⇒ Special login to members, employees etc.
- ⇒ Fast in response
- ⇒ E-commerce up gradation

DUCC Systems Service

Our services form an Integral part of our business relationship with our clients. We are committed to service for the clients. Any further updating in the website or the addition of any particular application in the website is possible. We offer a free six months service after sale. This shall include any static updating in the website.

The step of website updating is simple:

- Just mail the textual or photographic content and the data shall be uploaded within an hour of receipt.

Web Site is always designed and developed keeping in mind the target audience. The website must be informational as well as influential for the target audience. The purpose of the website must be achieved through it.

Sometimes, the website needs to be professionally presented while the other time it could be a little childish in its presentation. There could be organizations where both requirements co-exist like schools, colleges etc. We at DUCC Systems do understand the needs of the specific client organization and we are committed to cater to all such requirements.

Our Philosophy

DUCC Systems has over 3 years combined business, software, and Internet experience. Our staff is made up of previous small business owners, software gurus, and design specialists. Our #1 Priority is customer satisfaction, not only for our clients, but for the customers of our clients. Our success is measured by your success! DUCC Systems prides itself in understanding our customers and their business. This allows us to create a business solution using Internet technology to help our customers positively affect their bottom line.

Applications

The website does not need to be a standalone web solution. Different application can be integrated with the website. Some of the applications could be an E-commerce based website. All financial transactions are carried from the website of the organization. An example of such a business solution could be an MLM website. It should cater all the E-commerce solutions to its clients.

In today's business environment, it is not only crucial to have a presence on the Internet, but one that meets the needs of your customers and your business. A well-designed web site that offers solutions for customers can make the difference between success and failure. A great website can be an extremely valuable tool, especially for small business. It can "sell" your services 24 hours a day, 7 days a week, and it can be there when the potential customer needs information about your business, even in those times when you can't.

DUCC Systems specializes in developing end-to-end Internet solutions. Our goal is to create an integrated solution that will help you grow your business using the Internet. We do this by listening closely to your needs, your existing business strategies, and your ideas.

DUCC Thanks You !!
